Prefar® 6-E
Selective Herbicide
EPA Reg. No. 10163-222

For Preplant Incorporated Application On Bulb Onions Planted In The Spring

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

All applicable directions, restrictions, and precautions on the EPA-registered label are to be followed.

This labeling must be in the possession of the user at the time of pesticide application.

CROP

Bulb Onions

PESTS CONTROLLED

Barnyardgrass, Common Lambsquarters, Foxtail and Redroot Pigweed

USE RATE and METHOD OF APPLICATION

Apply PREFAR 6-E to a flat seedbed prepared by standard cultural practices.

- **BAND APPLICATION-** Apply in the fall 2 quarts of PREFAR 6-E per acre in 10-50 gallons of water in a 10-12 inch band and bed-up, throwing soil from the furrows over the sprayed band of PREFAR 6-E. Allow to remain undisturbed until spring. Prior to planting in spring, drag-off the bed tops with a spike-tooth harrow being careful not to drag off soil below the level of PREFAR 6-E application. Plant in the center of the beds.
- **BROADCAST APPLICATION-** Apply in the fall 4 quarts PREFAR 6-E per acre and incorporate. Follow directions for APPLICATION AND SOIL INCORPORATION given on the main label. Bed-up and allow to remain undisturbed until spring. Prior to planting in the spring, drag-off the bed tops and plant in the center of the beds.

RESTRICTIONS

Do not apply this product through any type of irrigation system.
